

INFRARED PANEL HEATERS 2025

OPRANIC®

PATENTED MANUFACTURING REDUCE HEATING COST

- ✓ SUPERIOR PERFORMANCE
- ✓ 5 YEARS WARRANTY
- ✓ NO MAINTENANCE COST
- ✓ EASY INSTALLATION

THE PREMIUM INFRARED HEATING

Radiation heating works by turning electric energy into infrared rays which efficiently warms up objects in the room and floors and walls instead of heating the air. Infrared waves only produce heat when they touch a surface such as a wall, an object or our bodies. When the waves touch such a surface the warmth is either absorbed or reflected to another object where they can be absorbed.

COST EFFICIENCY

With its Innovative technology Opranic infrared panel heaters create cosy warmth and an ideal climate efficient by keeping overall costs low. They are ideal for creating healthy and natural heat that feels like the Sun, a warm climate that feels in individual rooms, apartments, offices and entire houses. Alternatively, they can be used as a primary heat source throughout your entire home. No matter if you are looking to heat a new building, upgrade your heating system during renovation work or find the ideal Opranic heating solution for your building extension are your choice.

P3-SERIES ALUMINUM

P5-SERIES METALL

P6-SERIES HYBRID TECHNOLOGY

P7-SERIES GLASS

P3 - ALUMINIUM SERIES

Very fast heating, elegant, white glass front, lightweight material, no dust build-up when heating, easy installation.

P5 - METAL SERIES

Slim design, elegant design in white, satin matt, steel housing, 2.5 cm rear insulation, efficient heat distribution. Can also be used as a towel heater with towel heater accessory.

P6 - HYBRID SERIES

Flat housing: Only 4 cm deep. Combination of infrared heat and convection heat. Additional convection ribs. Dual hybrid heating with high efficiency. Continuous temperature control. Can also be used as a towel heater with towel heater accessory.

P7 - GLASS SERIES

Flat design - elegant, white glass front. Material: Safety glass, 2.5 cm, rear insulation, high energy efficiency.
